

School Nurse: The School nurse, is a registered nurse who identifies and treats health disorders among students and provides instructions on the maintenance of good health and disease prevention. The school nurse must evaluate the physical condition of students and refer students to appropriate resources as needed.

The School Nurse is audited by the **School Physician** for quality and standards of practice and is part of the Administration Team. She cooperates with other members of staff, in particular in the development of good practices and policies as well as planning and problem solving.
