

ARIS Device Guide - 2022/2023 Academic Year

Early Years - Playgroup, Nursery & Reception

Face to face learning: All students from early years will be provided with sanitised tablets from school based on their lessons. This will be organised by the teacher and IT department internally within the school.

Virtual Learning: In this scenario, parents will be required to have a device at home which will be used by the student to attend virtual classes and submit assignments assisted by the parent.

PYP - Year 1 & Year 2

BYOD (Bring Your Own Device): Students under this category are allowed to bring their own devices from home as long as they meet the criteria for the following minimum specs:

All tablets are either Samsung or Apple devices

- All tablets must have an electronic stylus, keyboard and wired earphones compatible with the make of your tablet
- 9.5" minimum screen size
- 3 GB minimum RAM
- 256 GB internal storage
- 5MP rear camera
- Battery - 6500 MAh
- All screens must have screen protectors and tablet covers
- Installed Device Control ([Guide](#)), please ensure there are no games or social media apps installed on the device used for school.
- Licensed antivirus software without which devices will not be allowed to use the school network
- The devices should not have any SIM cards installed in them. In case students need to communicate with parents they can do so by asking the homeroom teacher

PYP - Year 3, 4

BYOD (Bring Your Own Device): Students under this category are allowed to bring their own devices from home as long as they meet the criteria for the minimum specifications:

Please Note: If you are in Year 4 and are intending to purchase a new one, we recommend that you take a look at the device requirement from the PYP - Year 5,6 category to avoid purchasing a device in Year 5.

The minimum device specifications for this group are as follows:

- All tablets are either Samsung or Apple devices
- All tablets must have an electronic stylus, keyboard and wired earphones compatible with the make of your tablet
- 9.5" minimum screen size
- 3 GB minimum RAM
- 256 GB internal storage
- 5MP rear camera
- Battery - 6500 MAh
- All screens must have screen protectors and tablet covers
- Installed Device Control ([Guide](#)), please ensure there are no games or social media apps installed on the device used for school.
- Licensed antivirus software without which devices will not be allowed to use the school network
- The devices should not have any SIM cards installed in them. In case students need to communicate with parents they can do so by asking the homeroom teacher

We highly recommend the use of an iPad Air with apple pencil and keyboard for reasons already mentioned in the observations. See below the minimum specifications of the iPad Air 2020, you can buy an upgraded version based on your choice:

- 10.9" screen size
- 3 GB minimum RAM
- 64 GB minimum internal storage (students store their files online on G-Drive)
- 12 MP rear camera
- Apple pencil and keyboard
- Tablet cover and screen protector
- Installed Device Control ([Guide](#)), please ensure there are no games or social media apps installed on the device used for school.

- The devices should not have any SIM cards installed in them. In case students need to communicate with parents they can do so by asking the homeroom teacher
- Licensed antivirus software without which devices will not be allowed to use the school network

PYP - Year 5, 6

BYOD (Bring Your Own Device): Students under this category are allowed to bring their own devices from home as long as they meet the criteria for the minimum specifications. **Students can choose any one of the following options** based on their skill set and their comfort level at using various technological platforms.

The minimum device specifications for this group are as follows (we recommend Option 1):

Option 1: Laptop

Apple Macbook Air with the following **minimum** specifications:

- Display 13.3” LED-backlit display
- Apple M1 chip, 8 core CPU with 7 core GPU
- 8 GB memory
- Storage (256 GB)
- Macbook cover
- Licensed antivirus software without which devices will not be allowed to use the school network
- USB-C Hub (With USB, HDMI ports and headphone jack)
- Wired earphones compatible with the USB-C hub
- Installed Device Control ([Guide](#))

OR

Option 2: Laptop

Windows based laptop with the following **minimum** specifications:

- 13” display
- Core i3 10th generation and above

- 12 GB memory
- Storage (256 GB)
- Laptop Cover
- Licensed antivirus software without which devices will not be allowed to use the school network
- Wired earphones
- Installed Device Control ([Guide](#))

Please note: If you already bought a device in Year 4 or 5, you can continue to use the device till the end of Year 6. Year 7 onwards it is mandatory for students to have a laptop.

MYP - Year 7,8,9,10,11

Having built and honed their IT skills in PYP, students in MYP classes are expected to be independent and fierce users of technology. All aspects of learning in MYP are on a digital platform and without an appropriate device students will be severely disadvantaged in achieving their academic and personal learning goals. One of the learnings from the MYP e-assessment has been the use of language keyboards as students are expected to be proficient language typers. Students from these year groups can procure their own devices however, they have to strictly follow the specifications of the devices as prescribed by school. **Based on the requirements for MYP e-assessment use of laptops from Year 7 onwards is mandatory. Students can choose any one of the following options** based on their skill set and their comfort level at using various technological platforms.

The minimum device specifications for this group are as follows (we recommend Option 1):

Option 1: Laptop

Apple Macbook Air with the following **minimum** specifications:

- Display 13.3” LED-backlit display
- Apple M1 chip, 8 core CPU with 7 core GPU
- 8 GB memory
- Storage (256 GB)
- Macbook cover
- Licensed antivirus software without which devices will not be allowed to use the

- school network
- USB-C Hub (With USB, HDMI ports and headphone jack)
- Wired earphones compatible with the USB-C hub
- Installed Device Control ([Guide](#))
- USB Keyboard for Language B (As an example, students with Arabic as Language B will be using Arabic USB keyboard for their language classes)

OR

Option 2: Laptop

Windows based laptop with the following **minimum** specifications:

- 13” display
- Core i3 10th generation and above
- 12 GB memory
- Storage (256 GB)
- Laptop Cover
- Installed Device Control ([Guide](#))
- USB Keyboard for Language B (As an example, students with Arabic as Language B will be using Arabic USB keyboard for their language classes)
- Licensed antivirus software without which devices will not be allowed to use the school network
- Wired earphones

DP - Year 12,13

Students in these year groups are fully independent and have ownership of their learning. Parents should be mindful that procuring a new, good specifications laptop at this stage will serve their wards all the way through college. We highly recommend a new device purchase in Year 12 to facilitate learning in these crucial years and something that the students can use through their college life. Students from these year groups can procure their own devices however, they have to strictly follow the specifications of the devices as prescribed by school. **Students can choose any one of the following options** based on their skill set and their comfort level at using various technological platforms.

Please Note: Our recommendation for laptops for college use does not apply for students who wish to pursue specialised subjects like Arts, Engineering etc in college. Please refer to specific colleges for their requirements.

The minimum device specifications for this group are as follows (we recommend Option 1):

Option 1: Laptop

Apple Macbook Air with the following **minimum** specifications:

- Display 13.3” LED-backlit display
- Apple M1 chip, 8 core CPU with 7 core GPU
- 8 GB memory
- Storage (256 GB)
- Macbook cover
- Installed Device Control ([Guide](#))
- Licensed antivirus software without which devices will not be allowed to use the school network
- USB-C Hub (With USB, HDMI ports and headphone jack)
- Wired earphones compatible with the USB-C hub

OR

Option 2: Laptop

Windows based laptop with the following **minimum** specifications:

- 13” display
- Core i3 10th generation and above
- 12 GB memory
- Storage (256 GB)
- Laptop Cover
- Installed Device Control ([Guide](#))
- Licensed antivirus software without which devices will not be allowed to use the school network
- Wired earphones

If you have any questions or queries regarding the devices please refer to the FAQ given below. In case your question has not been addressed in the FAQ, please use the following form to contact us [Device Query Form 2021/2022](#)

FAQ

Do we have to buy a tablet for our ward?

Yes, all students starting Year 1 to Year 4, have to use a tablet and bring it to school everyday.

I have two children enrolled in the school, can they share a tablet or laptop?

No, all students must have their own tablets/laptops for use in school much like personal notebooks, bags, uniforms. Teaching and learning at ARIS is based on technology and it is imperative that students have their own personal devices based on the Device Guide Book 2022/2023.

Do I have to buy the devices from school?

Parents can buy their own devices from wherever they find convenient, as long as it meets the guidelines prescribed by the school. However, during the Taking Care of Business a device supplier will set up shop on our premises and you can place your orders directly with them.

Do I have to stick to the guidelines provided by school?

The purpose of anything ARIS does is to facilitate student learning and growth. The said specifications in the guideline are the minimum requirements which will help your ward achieve their academic and personal learning goals. Using the guidelines provided will make it easier for your wards to achieve their set goals.

Why is the school requesting licensed antivirus software for all devices?

With the increased usage of the internet and its associated technologies, there are increased incidents of malware attacks and security threats. Although the school has inbuilt systems to protect all systems within the school network however, school networks are not the only networks students use these days. Licensed antivirus softwares is a must first step for protecting students from online thefts, data leaks and other malpractices.

How do I install Device control on my ward's device?

A guide has been provided here to assist you in installation of device control ([Guide](#)). However, in case you need assistance, kindly fill out the form here [Device Query Form 2022/2023](#).

Why is the school promoting Apple products?

There are many reasons why we recommend Apple devices as opposed to other devices, which include but are not restricted to the following:

- a) Apple devices have an extended lifespan and can be used on an average for 4-5 years.
- b) Apple devices allow for better control of student devices.
- c) In general, people find Apple devices to be intuitive and easier to use.
- d) All Apple devices naturally have higher specifications in comparison to their competing Windows based systems. In fact a high specification Windows based device is priced similar to an Apple device in the market.
- e) Apple devices have better end-user experience due to their ease of use which allows more time spent by students engaged in learning rather than troubleshooting technical issues.
- f) Finally, ARIS is moving forward to be an Apple School and has already started the initiative by investing in Apple devices for staff.

Who do I contact if I have a query that has not been answered in the FAQ?

Please use the following form to send in questions/queries not addressed in FAQ [Device Query Form 2022/2023](#). We will continue to add to the FAQs as and when new queries arrive.
